

Pedro Nascimento de Lima

Associate Engineer, RAND Corporation

www.pedrodelima.com

EDUCATION

Pardee RAND Graduate School, Santa Monica, CA

Ph.D. in Policy Analysis

Oct 2022

M.Phil. in Policy Analysis

Dec 2020

UNISINOS University, São Leopoldo, Brazil

M.S. in Production Engineering

Feb 2018

B.S. in Production Engineering

Mar 2016

PROFESSIONAL EXPERIENCE

RAND Corporation

Santa Monica, CA

Associate Engineer

Oct. 2022 - Present

- I work in research grants and contracts sponsored by organizations including the National Institutes of Health (NIH), the National Science Foundation (NSF), and the United States Air Force.
- I am a CISNET junior investigator working with the Colorectal Cancer group. CISNET is a consortium of NCI-sponsored investigators who use simulation modeling to improve our understanding of cancer control interventions.

Assistant Policy Researcher

Sep. 2019 - Oct. 2022

- Developed the R package containing the epidemiological model and the analytic data pipeline underlying [RAND's COVID-19 State Policy Tool](#). The tool became RAND's **most popular** research of 2020 and was honored with a RAND Silver Medal Award.
- Developed the famexplorer R package - an [R/Shiny](#)-based visualization web app allowing researchers to create interactive visualization tools for their microsimulation analyses.

Argonne National Laboratory

Lemont, IL

Visiting Graduate Student - Decision and Infrastructure Sciences Division

Dec. 2020 - Present

- This appointment allows me to leverage Argonne's High-Performance Computing resources to perform large-scale (e.g., > 50,000 CPU hours) computational experiments and answer policy questions that would be intractable with limited computing resources.

University of Southern California

Los Angeles, CA

Adjunct Instructor - USC Sol Price School of Public Policy

Aug. 2021 - Dec. 2021

- Taught Essential Statistics at USC Sol Price School of Public Policy.

UNISINOS University

São Leopoldo, Brazil

Lecturer - Polytechnic School

Feb. 2018 - Jun. 2019

- Taught the following disciplines in undergraduate and MBA classes: Operations Research - Linear Programming; Simulation Modeling (Discrete Event Simulation); System Dynamics Simulation; Operations Management; Information Systems Management.
- Advised undergraduate and MBA students in their capstone research projects. One received the Best Brazilian Production Engineering Undergraduate Dissertation Award from ABEPRO (2019).

Master Research Assistant - GMAP | UNISINOS Research Group

Feb. 2016 - Feb. 2018

- Developed a Monte Carlo Simulation package in R for cost-benefit analysis of Organizational Safety and Health Initiatives.
- Developed algorithms for exploratory modeling and analysis of system dynamics models in R.
- Developed a competition dynamics model for the Professional Additive Manufacturing Industry.

Undergraduate Research Intern - GMAP | UNISINOS Research Group

Jun. 2013 - Feb. 2016

- Developed a competitive dynamics model of iron ore producers, accounting for regional comparative advantages and detailed substitution dynamics among different iron ore types.
- Developed a VBA tool to run and summarize simulation results.
- Conducted Business Process Modeling of productivity and innovation induction programs for government agencies in Southern Brazil (AGDI and SEBRAE/RS).

**Rede Industrial
Chief Analyst**

Presidente Lucena, Brazil

Jan. 2012 - Jun. 2013

- Oversaw SIGMA's (a CMMS) software development and support teams.
- Conceptualized most of the new features included in the 2012 release, including the SIGMA's integration module, Sigma SMS module and SIGMA's Android App.

Business Analyst

Jan. 2009 - Jan. 2012

- Conducted software requirements analysis for internal and external clients.
- Developed SQL queries for database reporting and bug troubleshooting.
- Streamlined software development processes implementing and customizing Jira workflows.

DISTINCTIONS AND AWARDS

RAND Silver Medal Award

RAND Corporation, 2021

Alongside Lawrence Baker, Raffaele Vardavas, Alyson Youngblood, and Heather McCracken, for developing RAND's COVID-19 State policy tool.

Innovation Spotlight Award

RAND Corporation, 2020

For developing the FAM Explorer R package - An interactive visualization tool for FAM-based dynamic microsimulation models.

Best Brazilian Production Engineering Undergrad Dissertation (Advisor) *ABEPRO, 2019*

Title: Process Mining and SLA violation prediction at a multinational software company. Student: Eduardo Mazzuco.

Best Brazilian Production Engineering Masters Dissertation (Author) *ABEPRO, 2018*

Title: Strategic Decision Making Under Deep Uncertainty in the 3D Printing Industry: A Robust Decision Making Analysis. ([full text](#)).

Best Brazilian Production Engineering Undergrad Dissertation (Author) *ABEPRO, 2016*

Title: Problem Structuring Methods: A Review of Methods to address Complex Problems. ([full text](#)).

Inovapps 2015 Prize *Brazilian Communications Ministry, 2015*

For proposing and developing the open-source Avalia Brasil Android App. Collaborators: Nataniel Schling and Klaus Klein. ([github repository](#))

SOFTWARE: R PACKAGES AND TOOLS

I often contribute to projects by developing R packages to make the code base more reliable, portable, and valuable for future projects.

randcast.wtchp: Cost Forecasts for CDC's WTC Health Program *RAND, 2021*

This package creates ensembles of forecasting models for CDC's World Trade Center Health Program.

crcrdm: Robust Decision Making Tools for Colorectal Cancer models *RAND, 2021*

This package is a tool to facilitate the use of RDM methods with CRC models.

c19randepimod: RAND's COVID-19 Epidemiological Models *RAND, 2020*

The c19randepimod package is the R package behind RAND's COVID-19 State Decision Support Tool.

gerbil: Generalized Efficient Regression-Based Imputation with Latent Processes *RAND, 2021*

I've made minor contributions to help Michael Robbins organize his multiple imputation package.

famexplorer: A Visualization Tool for the FAM Microsimulation Model *RAND, 2019*

The famexplorer package reads output data and creates a shiny app for the FAM Model. The package is flexible enough to be reused across projects. It creates a dynamic user interface given a prior specification of modules the researcher wants to see in the web app.

PROFESSIONAL AFFILIATIONS AND ACTIVITIES

MIDAS Network

MIDAS Student Committee volunteer *2020 - 2022*

Society for Decision Making Under Deep Uncertainty

Communications and Outreach Chair *2019 - 2020*

Member, Communications Team Volunteer *2017 - 2018*

NUGEEP - Rio Grande do Sul State Student Chapter - ABEPRO

President *2015 - 2016*

TECHNICAL SKILLS

Programming	R (my primary language), python, STATA, SAS (if needed)
High-Performance Computing	slurm, Swift/T, EMEWS with R
Web Apps Development	R's Shiny Package
Relational Databases	mySQL, MS SQL Server
Modeling and Simulation	iThink, Arena, deSolve R package
Other Tools	Tableau, Wordpress, Git
Github profile	github.com/pedroliman
Blog with R-related posts	www.pedrodelima.com
